Git for Windows v2.55.0(2) Release Notes

Latest update: July 2nd 2026

Introduction

These release notes describe issues specific to the Git for Windows release. The release notes covering the history of the core git commands can be found [in the Git project](#).

See <http://git-scm.com/> for further details about Git including ports to other operating systems. Git for Windows is hosted at <https://gitforwindows.org/>.

▷ Known issues

Should you encounter other problems, please first search [the bug tracker](#) (also look at the closed issues) and [the mailing list](#), chances are that the problem was reported already. Also make sure that you use an up to date Git for Windows version (or a [current snapshot build](#)). If it has not been reported yet, please follow [our bug reporting guidelines](#) and [report the bug](#).
